Summary

Engineering student specializing in **Data Engineering**, building production-grade **ELT pipelines** with integrated **LLM workflows** (LangGraph, Airflow). Currently pursuing **AWS Data Engineering certification**. Seeking a full-time, on-site Data Engineering internship to grow expertise in cloud infrastructure and LLM-powered data systems.

Education

University of Quebec Chicoutimi

Aug 2025 – Jun 2026

Data engineering - LLM Integration | Master's degree in computer science

- Ongoing: **AWS Data Engineering Professional Certificate** (DeepLearning.AI) - data lakes, ETL/ELT pipelines, Airflow, Terraform, AWS (EC2, S3, RDS, Kinesis), data observability.
- Designed an ELT pipeline (**Python**) collecting Data Engineer job postings across LATAM via REST APIs. Orchestrated with **Apache Airflow** (TaskFlow API, Dataset-driven chaining) on Dockerized Linux VPS. Integrated **LangGraph** (Mistral, Gemini) for data extraction and categorisation. Multi-layer architecture (Bronze/Silver/Gold) on **Backblaze B2** and **PostgreSQL Neon**. **Streamlit** dashboard with job visualization, pipeline monitoring, embedded LLM agent using Tavily web search.

Polytech Marseille

Sep 2023 – Apr 2026

Computer Science — Data Science & AI — Software development | Engineering degree

- Engineering curriculum combining software development, data science, data analyse, and applied AI, with coursework in algorithms and data structures, databases, computer architecture and systems, networking, cloud computing, cryptography, and object-oriented/concurrent programming.

Work History

Data Engineering Research Project

May 2025 – Jul 2025

LIS Laboratoire recherche informatique automatique systèmes Marseille • Marseille

Designed and built an end-to-end ETL pipeline using **n8n** to collect and process cryptocurrency market data

Data Automation Intern — Cybersecurity

Jul 2022 – Aug 2022

Direction générale des Finances publiques • Marseille

Built an internal **web scraping** tool in **Python/Selenium** to cross-reference antivirus data with the IT asset inventory. Gained exposure to a government cybersecurity environment with strict confidentiality standards.

Skills

Language

French: C2 (Native), English: B2 (TOEIC), Spanish: A2 (Elementary)

Technical

Python, Java, SQL, Docker, PostgreSQL, Apache Airflow, Data Modeling, ELT/ETL Pipeline Development, Data Warehousing, Data Lake, Data Visualization (Streamlit, Tableau), Cloud architecture, AWS (in progress), Software Engineering (OOP, Design Patterns, Git)

Soft skills

Problem solving, Teamwork, Communication
