

French student at Polytech Marseille, France & University of Quebec, Canada.

Seeking End-of-Studies Internship in Data Engineering & LLM Integration

To whom it may concern,

I am writing to express my interest in a Data Engineering internship within your company, ideally starting between late 2026 and early 2027. I am currently completing a dual French-Canadian engineering degree, specializing in Cloud Data Engineering and LLM Integration.

I came across the Senior Data Engineer, BigQuery Pipelines position at De Lei Interim in Santiago, and while my profile aligns more with an internship at this stage, I wanted to reach out to explore whether there might be opportunities for someone with my background. The role's focus on cloud-based data pipelines and SQL optimization resonates with my current work, especially as I deepen my expertise in AWS and large-scale data systems. Santiago's vibrant tech environment would also be an ideal place to actively improve my Spanish while contributing to real-world projects. What excites me most is the chance to work on production-grade pipelines, particularly those involving BigQuery and Python, as I'm eager to apply my skills in ELT development, data modeling, and cloud infrastructure to challenges like those described in your posting.

I recently began the AWS Data Engineering Professional Certificate by DeepLearning.AI, and am working in parallel on personal projects related to the concepts covered in each chapter.

I have built a complete pipeline for tracking job postings and monitoring the Data Engineering market in Latin America (Argentina, Chile, Uruguay), with LLM integration for data extraction, and interactive data visualization and pipeline monitoring. I encountered numerous technical challenges and consistently found alternative approaches or solutions to overcome them. I found it genuinely fascinating to design an architecture that balances both technical constraints and cost efficiency, turning each obstacle into an opportunity to refine the system further. You can view the live dashboard here: internshiplatam.streamlit.app/

I would welcome the opportunity to discuss how my skills could contribute to your team. Thank you for considering my application, and I look forward to hearing from you.

Sincerely,
Roland OUCHERIF
